Description and Application

Rutile type heavy coated iron powder electrode with an efficiency of 165% approx. It is designed for butt and fillet welds, used for filling large weld sections and making long fillet welds. Excellent arc stability, soft fusion, fine ripples, self releasing slag, very low spatter. Easy arc striking and re-striking. Applied for heavy steel structures, storage tanks, bridge girders, fabrication of earth moving equipments, pressure vessels etc. Frequently used for butt-welding plates with a heavy thickness and for fillet welds.
